

SURVIVOR[®]

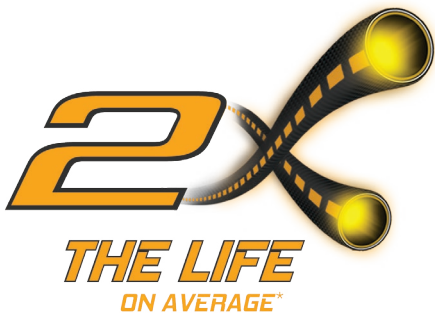

Now that we have your attention, we would like to introduce you to our family of hose that features the Survivor[®] compound.

One of the toughest cover compounds used on Continental ContiTech conveyor belts, the **Survivor compound** is now available inside a family of Continental ContiTech material handling hose. It is able to withstand serious abuse and still last longer. Survivor[®]: The name says it all.

*Based on lab results from DIN test with non-rotating head versus abrasion-resistant SBR compounds. Service life may vary depending on application conditions.

Introducing the Survivor[®] compound, available on our family of hose.

By transferring the innovation and success of the Survivor[®] compound from our conveyor belt division to our industrial hose business, we are improving the options you have to get tough jobs done with less hassle. And this improved Tufsyn[®] compound is lined up and ready to go to work for you.

With twice the abrasion resistance*, adding Survivor[®] compound could help outperform your current abrasion-resistant SBR hose.

› Ideal for fine particles at high velocities - sand, wet concrete and other slurries.

› Static conductive

Available in:

- › Plicord[®] Blast Hose - 549-020
- › Allcrete[®] Textile - 549-638
- › Blucor[™] - 541-789
- › Black Softwall - 549-148
- › Allcrete[®] Wire - 549-670
- › Flextra[®] Dry Material - 549-951

If you are ready to hold less inventory, reduce your downtime and double the life of your material handling, give your sales representative a call or visit www.contitech.us.

*Based on lab results from DIN test with non-rotating head versus abrasion-resistant SBR compounds. Service life may vary depending on application conditions.
